INSTRUCTIONS FOR USE AND MAINTENANCE BATA INDUSTRIALS SAFETY SHOES

IMPORTANT

You have chosen work shoes from Bata Industrials. These work shoes have been developed using the latest technology and in accordance with the relevant safety standards. By following the advice below, you will extend the life of your shoes and work more safely and comfortably.

1. FIT AND USE

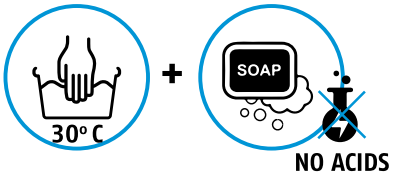

A good fit and correct use are essential for comfort and safety.

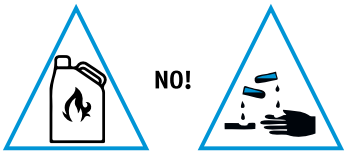

- Shoes that are too small, too narrow, or too large cause friction and are also less safe. If in doubt, have your feet measured.
- Only use work shoes for their intended purpose (walking, running, standing) and under the recommended working conditions.
- Safety shoes are not suitable for all situations or for personal use.

2. CLEANING AND MAINTENANCE

Regular cleaning and proper maintenance will extend the life of your work shoes.

- Remove dirt with a damp cloth or soft brush.
- Use high-quality cleaning products that are suitable for the material.
- Warm water is permitted, possibly with mild soap (without acids).
- Never use corrosive cleaning products.
- Care for leather shoes with a specially designed maintenance product.

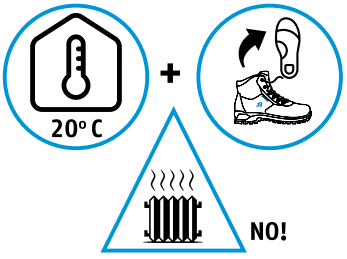

Work safe. Live great.

3. DRYING

Moisture shortens the lifespan of your shoes.

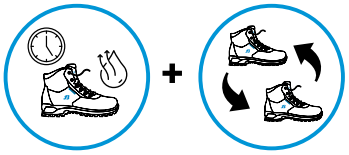

- Allow shoes to dry at room temperature (± 20 °C). Use newspaper to absorb moisture.
- Remove the insoles during drying and never place shoes near a heat source.

4. ALTERNATE

By regularly alternating between pairs of work shoes, your shoes will have time to recover.

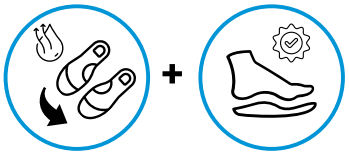

- Put on your everyday shoes after work.
- Allow perspiration to evaporate sufficiently.
- If possible, alternate between two pairs of work shoes.

5. INSOLES AND COMFORT

The correct use of insoles contributes to comfort and safety.

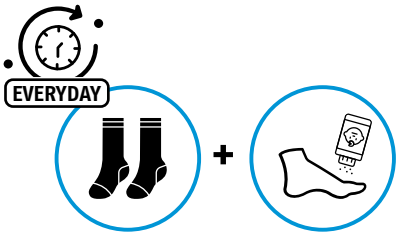

- Replace or change insoles if they become very sweaty.
- Only use insoles that are certified by the manufacturer for this work shoe.
- The use of non-certified insoles may invalidate the shoe's CE certification.

6. SOCKS AND FOOT CARE

Good socks and well-cared-for feet form a whole with your work shoes.

- Wear clean, high-quality socks every day.
- Wash and dry your feet thoroughly, especially between the toes.
- Talcum powder can help with excessive perspiration.
- Bata Industrials offers socks that meet safety and
- comfort requirements.

Work safe. Live great.
